

LIBEL SUIT ON SALOONS MUST TOO MUCH COIN SEEKER AFTER TREASURE

Washington Politician Asks Heavy Damages From Newspaper.

Cause of Action Grew Out of An Article Printed During Campaign.

GLOBE, Ariz., May 10.—To defend a libel suit for \$10,000, against the Tucson Star, Attorney C. L. Rawlins of Rawlins and Little has left for Tucson.

The suit will open Saturday. Owing to the amount of money involved, the suit is a very important one and a hard fought legal battle is expected.

The suit was brought some time ago by Sidney Bieber, a Washington politician, who came west last fall and took a hand in the Arizona political campaign. Bieber, a republican national committeeman, took up the fight for the election of Delegate Cameron, and during the fight, an article which Bieber considered derogatory to him appeared in the Star.

The suit is formally filed against the State Consolidated Publishing company, better known as the "Kelly String."

Attorney Rawlins has defended a number of suits against the company, of which George H. Kelly, his father-in-law, is president. He has been very successful in the past and is confident of winning the coming suit.

The crime of the Star amounts to no more than the publication of an extract from a speech delivered by Senator Carter of Montana, several years ago, in which Bieber was called a lawbreaker and land thief. Bieber was at that time lobbying in Washington for the passage of legislation in regard to certain lands in the District of Columbia, which if successful would have promoted a fraud on the government to the benefit of Bieber and his associates.

Senator Carter was on a committee which investigated this proposed legislation and in connection with the committee report made the speech.

When Bieber showed up in Arizona last fall he became quite officious, for a total stranger, in directing political affairs. He was the one who gave out the report that if Ralph Cameron was elected to congress there would be no further opposition to the admission of Arizona offered by republicans, either in the senate or in the house.

The article published in the Star, and for which suit is brought, was published in other democratic papers in the territory.

After the election Bieber gave out the announcement that he expected to come to Arizona and go into the newspaper business, but no one took him seriously regarding this proposed venture. At first it was given out that Bieber was to buy a string of papers clear across the territory from Douglas to the Grand Canyon, then it was said that the Tucson Citizen was to pass under the spell and control of Bieber. The last announcement was to the effect that Bieber had ordered a plant for Globe, but that he would establish an afternoon paper in that city. About that time it was learned that Bieber had secured the afternoon Associated Press service for Globe, but up to date no type or printing press had arrived and the above-mentioned press service remains unpublished.

Perhaps Bieber is waiting to get the money from the Tucson Star to finance his various newspaper enterprises.

PRESCOTT IN TURMOIL DIPHTHERIA EPIDEMIC

Churches and Theatres Ordered Closed During Investigations.

PHOENIX, Arizona, May 10.—Territorial Health Officer E. S. Godfrey has received official notification of an epidemic of diphtheria in Prescott. The outbreak was reported by Dr. Southworth. A total of twelve cases have thus far been discovered within the limits of the city. Eight cases developed on the first day of the discovery of the disease and four subsequent cases developed.

The epidemic of diphtheria in the Yavapai city has had a demoralizing effect on business, it is said. The city council has ordered all schools closed and has likewise suspended operations of moving picture theatres and other places of amusement, where people in close confinement are apt to contract the disease. The council has also temporarily forbidden services in churches.

Immediately after the discovery of the diphtheria, the health officers of Prescott started an investigation and traced the disease as having been carried in milk. Operations at the dairy where the milk came from, immediately ceased and, pending an examination of the cows, that concern will refrain from dispensing its product. The present epidemic is what physicians term an "explosive outbreak."

PICNIC CROWD RETURNED

The band of about forty high school students who left on Friday morning early for an excursion in the Huachuca mountains, returned on Monday morning at 2:30 very tired from their trip. They drove Friday to Ramsey Canyon, from which place they walked and climbed eighteen miles to Miller Canyon, where camp was made. On the way back they stopped for some time at Box Canyon. The weather was ideal for a picnic and the entire party enjoyed themselves. The chaperones were Miss Edna Patterson, Mrs. C. O. Blair, Mr. Leslie Gooding and Mr. Partridge.

Mr. Roosevelt was mighty glad to see that lot of "birds."

PHOENIX, May 10.—By one long, hard, steady stroke, the outgoing city council is expiring hours of its existence came as near to putting the saloons of Phoenix out of business as was possible without actually prohibiting them.

Alderman Campbell introduced, and with the vote of Mayor Coglian and Alderman Yaeger, passed an ordinance that throws sufficient restrictions around the saloons to make them as public almost as a city park. Alderman Clancy voted against the measure, and Alderman John Marshall "passed."

In Campbell's drastic city law saloons can have no curbs on the windows, neither can they frost them or in any way seek to prevent those passing along the sidewalk from seeing who is drinking or loitering inside the highball resort.

Though the most important feature of the unobstructed view the public will get of the saloons is but one of the several features that are to be found in Campbell's ordinance. In fact, it is an ordinance with so many striking features that under ordinary circumstances it would have taken several ordinances to accomplish as much.

In offering his ordinance and voting for it, Alderman Campbell carried out the wishes of his constituents in the Second ward, which he represents, as well as what a large number of people in other parts of Phoenix believe to be for the best interests of the community.

Clancy tried to stave off the blow by dilatory tactics, claiming that judgment was being taken on the other members of the council. He thought that according to custom the ordinance should be referred to a committee and allowed to take the same course as the slaughter house petition.

In his soothing way, Alderman Marshall said that he had seen a similar ordinance tried out once before, and that it did not accomplish the purpose, but when it came to a vote he was not certain enough of what he had said to vote against it, but asked to be excused from voting.

Coglian, Campbell and Yaeger insisted that the vote be taken last night on the ordinance and by their strength of three to two it was passed and will become a law in ten days. So sweeping is the ordinance included practically all there is to do in the saloon business in Phoenix.

In framing the ordinance, Campbell included practically all there is to do in the way of restricting the sale of liquor, without actually declaring that it shall not be sold something the council cannot do. Among the sections of the ordinance are the following:

Liquor shall be sold only on the ground floor and in no room more than fifty feet from the property line; barrooms must be less than 12 feet in width, bars less than 30 feet long, and bars parallel to side of building; must not be any means of ingress or egress to any other part of building; all drinks must be served in barroom; shall be no chairs, stools, benches or tables front must be of glass, beginning at 5 feet from the floor and extending not less than 8 feet; shall be no screens to obstruct view liquor only on prescription; hotels, restaurants and lodging houses prohibited from selling liquor, proprietor of which has no license.

Alderman Yaeger, in discussing the ordinance, said that there was no desire to take snap judgment, and that he, as well as other members of the council, had considered the matter carefully. He said that it was his desire, as well as that of others, to eliminate all the objectionable features of the saloon business in Phoenix, but that it was not intended to be severe or unfair toward them.

ANTI-SALOON LEAGUE ORGANIZED AT YUMA

Prospective Membership of Over Hundred and Closing Movement Begun.

YUMA, May 10.—The temperance wave sweeping the length and breadth of the country, has included Yuma in its course. Following the Sunday visit of the Rev. W. L. Stewart of Phoenix, an active worker of the Anti-Saloon league, who preached three strong temperance sermons here on that day, the local Anti-Saloon league was organized at the Methodist church. There was a most enthusiastic meeting, about thirty-five being present. The league already has a prospective membership of more than a hundred and has reason to think it can boast three or four hundred within a year. The organization is a strong one in Arizona and has recruited many of the most influential people of the territory to its ranks, the present territorial head of the league being Mayor Coglian of Phoenix. The local officers chosen are: President, Rev. William Stewart; first vice president, C. A. Lindeman; second vice president, C. M. White; third vice president, Bert Nunnally; secretary, W. A. Peterson; treasurer, C. L. Hickson. The officers of the league are circulating a petition for the closing of one of the city saloons which has acquired an unsavory reputation.

SUNDAY SCHOOL PICNIC

Two of the classes belonging to the Sabbath school of the Christian church are planning to hold a picnic Tuesday afternoon of this week. The two classes are called the "Daisy Circle" and "Sunbeam" classes and they have been each pushing for a larger attendance during the past month, with the result that both classes now contain a large number of children and the picnic is certain to be an enjoyable affair.

AN EASTERLY WIND VISITED ARIZONA EXPRESSED HIS ADMIRATION FOR THE SPECTACULAR POSSIBILITIES OFFERED FOR THE FUTURE, BUT AT THE SAME TIME ASKED SOME PERTINENT QUESTIONS AND WAS OPEN IN HIS CRITICISM OF THE FINANCIAL METHODS, AS HE TERMED THEM, EMPLOYED IN THE DEVELOPMENT OR ATTEMPTED DEVELOPMENT OF SOME MINING PROPOSITIONS IN ARIZONA AND SONORA.

"What are these people trying to do?" he asked. "Do they want to drive capital away or are they only ignorant of the value of money and money-making methods?"

A prospector discovers good surface indications, and promptly gets his friends together to organize a company with a capitalization of a million dollars, maybe more. On what? Why, on a surface showing on which no work has been done and which may not ever develop beyond Mark Twain's definition of a mine. Possibly this prospector, or several of them, may do a hundred feet or so of work before incorporating and have a fair prospect in that case they would never think of incorporating for less than 3,000,000 to 5,000,000.

Why, they are crazy! That is no way to get capital interested or to develop a property. How can they ever expect to pay dividends on such a capitalization?

"The Calumet & Arizona company is capitalized at \$2,500,000, with only \$200,000 of their stock out. These Arizona and Sonora wildcaters will admit that this company has a few developed prospects in the Bisbee district, at Courtland and has a smelter at Douglas. It pays and has paid dividends. It has visible assets; it has material properties. Yet these brilliant wildcat financiers would utilize a doubtful prospect at a higher figure than the total issue of C. & A. stock, a proven proposition."

"All of the Phelps, Dodge & Co. mining and smelting interests have been syndicated into a stock company. This was not done until long after the Phelps, Dodge & Co. had produced. There were their great Warren district mines, others in other parts of Arizona, the great Picher and the Oquirrhui in Sonora, the smelter in Douglas, the concentrator at Calumet and a railroad, properties and tangible assets. They incorporated as a proven proposition after great dividends had been paid for \$50,000,000. If they had adopted the methods of which I am complaining they would have capitalized at a billion."

"If you Arizonians will come down to normal figures, you will draw investment and not drive it away. Your propositions will win admiration and not ridicule."

"A mining company is different from a railroad company. Your dividends must be taken out of the ground and once taken out can never be replenished or restored. They are gone and it is that much of the assets, taken out and distributed. Hence a fair dividend on a mining proposition is 20 per cent. If a railroad is entitled to the recovery of his capital with good interest, extra good interest, because of the risk he has taken, and will not have made a good investment unless he does. A railroad, properly administered, is ever increasing in value. Good real estate grows in value. But the mine in the end will be exhausted and valueless when all the ore is taken out."

"How do these million dollar, these five million dollar incorporations' prospects ever expect to return 20 per cent dividends? How can they ever expect to? No these schemes bear all the ear marks of a get-rich-quick scheme for the promoters of a mine, and the sooner the mining men of this section drop a sober consideration of these facts and incorporate in thousands instead of in millions of dollars, just that much sooner will Arizona and Sonora receive the attention which they deserve."

"This is the opinion not infrequently heard advanced by men of the world and men of affairs who come to Arizona looking for opportunities to invest idle capital, and often return to their homes disgusted, not with what they found, but with the conditions they find."

INTERRED AT LONG BEACH
Word has been received by the officials of the local Y. W. C. A. that Miss Hope Smith, whose death was reported in The Review some days ago, was buried at Long Beach, Cal., on April 30th. Miss Smith will be remembered as a former general secretary of the association at this place.

PROBATE NOTICE

Notice of hearing petition in the Probate court of the county of Cochise, territory of Arizona.

In the matter of the estate of A. Jordan, deceased.
Notice is hereby given that M. J. Brown has filed in this court his petition praying for letters of administration of the estate of the above named decedent and that the same will be heard on Saturday the Fifteenth day of May, A. D. 1909, at 10 o'clock in the forenoon of said day at the court room of said county in Tombstone, county of Cochise, territory of Arizona, and all persons interested in said estate are notified that they should appear and show cause if any they have, why the prayer of said petitioner should not be granted.
Dated May 1st, 1909.
J. E. JAMES, Clerk.

D. SWIFT & CO.

Return from Cruise Around Coral Reefed Christmas Island in Pacific.

Found the Cave Indicated, but Bully Hayes' Treasure Not in Evidence.

HONOLULU, May 10.—The little schooner Concord returned a few days ago from an unsuccessful quest for buried treasure. The treasure sought was bulion and coin believed to have been hidden by Billy Hayes, the very real character who so long exercised such power as half pirate, half trader, in the South Seas, that the reality of his career has already been overlaid and almost buried under the wealth of myth that has grown up concerning him.

The Concord expedition was proposed by Elmer Low, a hard-headed and successful cattle man of Hawaii, and was financed and carried out by him and Captain Frederick C. Miller, a successful ship owner of Honolulu. Low says that some time ago an old sailor whom he has known for years, and of whose good faith he had no question, told him that Billy Hayes had made his hiding place and rendezvous at Christmas Island, the uncharted coral isle which came into such prominence a few months ago by the wreck on its reefs of the British steamship Aeon, carrying supplies for the American navy to Pago Pago. This sailor gave him the landmarks and the bearings by which the hiding place of Hayes' ill-gotten gains could be located.

Low proposed an expedition there to Captain Miller, as the latter owned the Concord and other vessels suitable for such an enterprise. The possibility of money to be made out of the salvage of the wreck of the Aeon, combined with the lure of Billy Hayes' hidden gold, appealed to the two men and between them they financed the expedition. Low accompanied it. He says that he had no difficulty from the landmarks and bearings given him by the old sailor. In finding the cave which had been described, which contained about \$100,000 of treasure, he was disappointed that it had been used as a rendezvous and hiding place. There was no treasure, however.

BISBEE, Cochise County, Ariz., March 1, 1909.
To Dennis Curran:
You are hereby notified that I have expended the sum of thirty-six hundred (\$3600) dollars in labor and improvements upon the following described mining claims, situate and being in Warren Mining District, County of Cochise, Territory of Arizona:

Home, recorded April 8th, 1905, Book 43, Record of Mines, page 413; Orion, recorded April 8th, 1905, Book 43, Record of Mines, page 414; Erie, recorded March 30, 1906, Book 36, Record of Mines, page 131;
